12.30pm	Lunch

ABOUT ECOSYS & INTERGRAPH PP&M

EcoSys, an Intergraph Process, Power & Marine company, is the global standard for enterprise project controls software. Its easy-to-use, web-based platform, EcoSys EPC (Enterprise Project Controls), helps organizations worldwide plan and manage project portfolios, control project costs, and improve project performance. Intergraph PP&M is part of Hexagon, and the leading global provider of engineering software for the design, construction and operation of plants, ships and offshore facilities. Together Intergraph and EcoSys deliver a portfolio of enterprise engineering software and project controls technologies that drive greater productivity and value for clients.
